PRELIMINARY ASSESSMENT REPORT

Date: April 12, 2002

Industrial Establishment/Site Name Veterans Memorial Park

Address Intersection of Church Street and Kaine Avenue

City or Town South Plainfield Zip Code 07080

Municipality Borough of South Plainfield County Middlesex

Block (s) 260 Lots (s) 15.02

Site Remediation Program Case Number 01-08-07-1845-23

1. Present a history of ownership and operations at the industrial establishment, in tabular form, from the time the site was naturally vegetated or utilized as farmland in accordance with N.J.A.C. 7:26E-3.1(c)1.i. (attach additional sheets as necessary)

Name of Property Owner	From	To
Borough of South Plainfield		Present

Name of Operator	From	To
Borough of South Plainfield		Present

- 2A. In accordance with N.J.A.C. 7:26E-3.1(c)1.ii, provide a clear and concise description of the past industrial/commercial operation(s) conducted on site by each owner and operator. To the extent available the site history shall include an evaluation of the following sources of information:

Provide the page or appendix number where the site history may be found. Appendix A

Name of Resource	Date of document reviewed	Appendix # if providing copies
Title Information	March 8, 2002	B
Historical Topographical Maps	March 5, 2002	C
Aerial Photographs	March 5, 2002	D
Local Agency Reviews	Various	E
State and Federal Records	March 6, 2002	F

- 2B. Include a detailed description of the most recent operations subject to this preliminary assessment.
See Appendix A

3. Hazardous Substance/Waste Inventory: N.J.A.C. 7:26E-3.1(c)1.iii. List all raw materials, finished-products, formulations and hazardous substances, hazardous wastes, hazardous constituents and pollutants, including intermediates and by-products that are or were historically present on the site. Note: If past usage included farming, pesticides may be a concern and should be included in this list.

The exact hazardous substances present on the property are unknown, however PMK conducted a limited site investigation of the property which consisted of installing seven borings and the collection of 5 soil samples for priority pollutant plus a forward library search of forty non-targeted compounds and 1 sample of the tar like substance for gas chromatograph analysis. The details and findings of the limited site investigation are detailed in the Limited Site Investigation Report dated April 12, 2002 prepared by PMK and attached with this PA.

- 4A. In accordance with N.J.A.C. 7:26E-3.1(c)1iv provide a summary of all current and historic wastewater discharges of **Sanitary and/or Industrial Waste** and/or sanitary sludges. Present and past production processes, including dates, and their respective water use shall be identified and evaluated, including ultimate and potential discharge and disposal points and how and where materials are or were received on-site. All discharge and disposal points shall be clearly depicted on a scaled site map.

Site Information

Discharge Period		Discharge Type	Discharge Location
1986 to	Present	Sanitary	Sanitary Sewer

- 4B. Provide a narrative of disposal processes for all historic and current process waste streams and disposal points. (attach additional sheets if necessary)

The property was used as a baseball field for several years prior to the construction of the bathroom structure on the property. The bathroom was erected on the property on-and was connected to the public sanitary sewer.

5. This question requires the applicant to conduct a diligent inquiry into the current and historic operations at the site to identify all of the potential areas of concern, which formerly or currently exists at the industrial establishment as defined in N.J.A.C. 7:26E-1.8.

I hereby certify that a diligent inquiry has been conducted to identify all current and historical potential areas of environmental concern and based on the diligent inquiry the areas of environmental concern identified below in question 5A through 5G are the only areas of environmental concern believed to exist at the above referenced industrial establishment.

A. Bulk Storage Tanks and Appurtenances, including, without limitation :

Area of Concern	Currently or Formerly Exists at the Site Yes/No	Location Referenced to the Site Map	Appendix Number
Aboveground Storage Tanks and Associated Piping	NO		
Underground Storage tanks and Associated Piping	NO		
Silos	NO		
Rail Cars	NO		
Loading and unloading areas	NO		
Piping, above ground and below ground pumping stations, sumps and pits	NO		

B. Storage and Staging Areas, including

Area of Concern	Currently or Formerly Exists at the Site Yes/No	Location Referenced to the Site Map	Appendix Number
Storage pads including drum and/or waste storage	NO		
Surface impoundments and lagoons	NO		
Dumpsters	NO		
Chemical storage cabinets or closets	NO		

C. Drainage systems and areas including without limitation

Area of Concern	Currently or Formerly Exists at the Site Yes/No	Location Referenced to the Site Map	Appendix Number
Floor drains, trenches and piping and sumps	NO		
Process area sinks and piping which receive process waste	NO		
Roof leaders when process operations vent to the roof	NO		
Drainage swales & culverts	NO		
Storm sewer collection systems	NO		
Storm water detention ponds and fire ponds	NO		
Surface water bodies	NO		
Septic systems leachfields or seepage pits	NO		
Drywells and sumps	NO		

D. Discharge and disposal areas, including, without limitation:

Area of Concern	Currently or Formerly Exists at the Site Yes/No	Location Referenced to the Site Map	Appendix Number
Areas of discharge per N.J.A.C. 7:1E	NO		
Waste piles as defined by N.J.A.C. 7:26	NO		
Waste water collection systems including septic systems, seepage pits, & dry wells.	NO		
Landfills or landfarms	NO		
Sprayfields	NO		
Incinerators	NO		
Historic Fill or any other Fill material	YES	AOC #1	H
Open Pipe discharges	NO		

E. Other areas of concern, including, without limitation:

Area of Concern	Currently or Formerly Exists at the Site Yes/No	Location Referenced to the Site Map	Appendix Number
Electrical Transformers & Capacitors	YES	AOC #2	H
Hazardous material storage or handling areas	NO		
Waste Treatment areas	NO		
Discolored or spill areas	YES	AOC #7	H
Open areas away from production areas	NO		
Areas of stressed vegetation	YES	AOC #3	H
Underground piping including industrial process sewers	NO		
Compressor vent discharges	NO		
Non-contact cooling water discharges	NO		
Areas which receive flood or storm water from potentially contaminated areas	POTENTIAL	AOC #4	H
Active or Inactive production wells	NO		

F. Building interior areas with a potential for discharge to the environment, including, without limitation:

Area of Concern	Currently or Formerly Exists at the Site Yes/No	Location Referenced to the Site Map	Appendix Number
Loading or Transfer areas	NO		
Waste Treatment areas	NO		
Boiler rooms	NO		
Air vents and ducts	NO		
Hazardous material storage or handling areas	NO		

G. Any other site-specific area of concern.

Area of Concern	Currently or Formerly Exists at the Site Yes/No	Location Referenced to the Site Map	Appendix Number
Black ooze emanating from the ground	YES	AOC #5	H
Sink Holes	YES	AOC #6	H

6. If the site area exceeds two acres, an interpretation of the aerial photographic history of the site shall be submitted in accordance with N.J.A.C. 7:26E-3.1(c)1.vi.

See Appendix D

7. Discharge History of Hazardous Substances and Wastes, N.J.A.C. 7:26E-3.1(c)1.vii :

A. Have there been any known discharges of hazardous substances and wastes at the site?

 No **X** Yes

B. Was the Department notified of the discharge?

 X Yes; No

If yes, provide the Case # **01-08-07-1845-23**

C. Was a no-further-action letter, negative-declaration approval or full-compliance letter issued as a result of the cleanup of this discharge?

 X No Yes

An anonymous tip notified the the NJDEP that "a tar like substance was observed emanating from the ground." The NJDEP sent officials to the Site to investigate and collect samples for PCBs analyses. Town officials were notified that the PCB analyses came back negative. NJDEP and Middlesex County Health Department have been notified in order to review documentation of this event.

8. In accordance with N.J.A.C.7:26E-3.1 (c) 1.vii, provide a description of any remediation activities previously conducted or currently underway at the site, including dates of discharges, remedial actions taken, and all existing sample results concerning contaminants which remain at the site. Copies of Department or other governmental agency no-further-action approvals should also be provided with a description of the areas to which the no-further-action approvals apply. This information is especially important if the approval was granted for the remediation of a portion of a site or a specific discharge event rather than the entire site subject to this preliminary assessment.

 X Check here if this question does not apply.

9. Protectiveness of past remedies, Order of Magnitude Analysis, N.J.A.C. 7:26E-3.1(c) 1.ix N.J.A.C. 7:26E, 3.2(a)5

A. Have any areas of concern previously received a No-Further-Action approval from the Department or other equivalent government agency for which no additional remediation is proposed? **X** No.

10. Historical Data on environmental quality at the Industrial Establishment

A. Have any previous sampling results documenting environmental quality of the Industrial Establishment not received a no further action approval from the Department or been denied approval by the Department? (N.J.A.C. 7:26E-3.1(c)1.viii)

 Yes **X** No

11. List all federal, state and local environmental permits at this facility, including permits for all previous and current owners or operators, applied for, received, or both (Attach additional sheets if necessary).

Check here if no permits are involved **X**

12. In accordance with N.J.A.C. 7:26E-3.1(c)xiii, provide a summary of enforcement actions (including but not limited to, Notice of Violations, Court Orders, official notices or directives) for violations of environmental laws or regulations (attach additional sheets if necessary):

A. Check here if no enforcement actions are involved X

13. In accordance with N.J.A.C. 7:26E-3.1(c) xiv, please provide a narrative description of all areas where non-indigenous fill materials were used to replace soil or raise the topographic elevation of the site, including the dates of emplacement.

Appendix H

14. A. In accordance with N.J.A.C. 7:26E-3.2(a) 3.i, submit a scaled site plan, detailing the subject lot and block, property and or leasehold boundaries, location of current and former buildings, fill areas, paved and unpaved areas, vegetated areas, and all areas of concern identified above and all active or inactive wells.

B. Scaled historical site maps and facility as built drawings (if available).

C. A copy of the United States Geologic Survey (USGS) 7.5 minute topographical quadrangle that includes the site and an area of at least one mile radius around the site. The facility location shall be clearly noted. If a portion of the USGS quadrangle is used, the scale, north arrow, contour interval, longitude and latitude with the name and date of the USGS quadrangle shall be noted on the map.

15. In accordance with N.J.A.C. 7:26E-3.2, please provide the date that the site visit was completed to verify the findings of the preliminary assessment. March 8, 2002

16. List any other information you are submitting or which has been formerly requested by the Department:

Description	Appendix #
Borough of South Plainfield Tax Map	Plate 2
Limited Site Investigation Report	Attached

CERTIFICATION:

The following certification shall be signed by the highest-ranking individual at the site with overall responsibility for that site or activity. Where there is no individual at the site with overall responsibility for that site or activity, this certification shall be signed by the individual having responsibility for the overall operation of the site or activity.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attached documents, and based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information, and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

APPENDIX A

VETERANS MEMORIAL PARK SITE HISTORY AND OPERATIONS

The Borough of South Plainfield currently owns the Site. The aerial photographs of the Site indicated that the Site has been used as a baseball field since 1954. There were also indications on the 1954 aerial photograph that portions of the northwest section of the Site were used for dumping.

On March 8, 2002, a PMK representative performed a site inspection. The Site is presently occupied by Veterans Memorial Park, which consists of a baseball field with lights, basketball court, playground, picnic areas, bathrooms and electrical shed. Most of the property is covered with grass except for a stone parking area off of Elm Street and an asphalt paved walkway that leads through the Site. Several sinkholes were noted scattered through out the site particularly in the northern section. There is black "tar like" substance emanating from the ground in several areas in the north central portion of the property, covering approximately 18,000 square feet. However many areas of stressed vegetation were also noted through out the grass areas in the vicinity of the unknown substance.

APPENDIX B

HISTORIC CHAIN OF TITLE REVIEW

Title information was provided by the Borough of South Plainfield, although no deeds or titles were available for our review, all interviewed municipal employees indicate the Borough of South Plainfield has always been the owner of the property.

APPENDIX C

HISTORICAL TOPOGRAPHICAL MAPS REVIEW

A review of all available Historical Topographical Maps was conducted to evaluate prior uses of the subject site and surrounding properties. Historical Topographical Maps from the years: 1955, 1970, 1981 and 1995 were reviewed. The following summarizes our findings based on the above-listed maps.

1955 Historic Topographical Map

A review of the 1955 Historic Topographical Map indicates the property is relatively flat. Ground surface elevation is approximately 50 feet above mean sea level (msl). The regional overland drainage is to the east. The property is undeveloped and a portion of the northeast section of the property is depicted as woodland. Two brooks one to the north and one to the south border the property. A residential area consisting of numerous dwellings borders the property to the east and to the west are woodlands. In a distance to the south is the Lehigh Valley Rail Road followed by two larger structures and numerous small structures.

1970 Historic Topographical Map

A review of the 1970 Historic Topographical Map indicates the property and surrounding areas have remained relatively unchanged since the 1955 historic topographic map.

1981 Historic Topographical Map

A review of the 1981 Historic Topographical Map indicates the property and surrounding areas have remained relatively unchanged since the 1955 historic topographic map.

1995 Historic Topographical Map

A review of the 1995 Historic Topographical Map indicates the property and property to the west are depicted as the Spring Lake County Park. The property has a paved road in a single loop through the property entering at Church Street and exiting the property at Elm Street on the east. The surrounding areas have remained relatively unchanged since the 1955 historic topographic map.

Copies of the Historic Topographical Maps are included in this appendix.

Environmental Data Resources, Inc. Historical Topographic Map Report

Environmental Data Resources, Inc.'s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property, and its surrounding area, resulting from past activities. ASTM E 1527-97, Section 7.3 on Historical Use Information, identifies the prior use requirements for a Phase I environmental site assessment. The ASTM standard requires a review of *reasonably ascertainable standard historical sources*. *Reasonably ascertainable is defined as information that is publicly available, obtainable from a source with reasonable time and cost constraints, and practically reviewable.*

To meet the prior use requirements of ASTM E 1527-97, Section 7.3.2, the following *standard historical sources* may be used: aerial photographs, city directories, fire insurance maps, topographic maps, property tax files, land title records (although these cannot be the sole historical source consulted), building department records, or zoning and use records. ASTM E 1527-97 requires "All obvious uses of the property shall be identified from the present, back to the property's obvious first developed use, or back to 1940, whichever is earlier. This task requires reviewing only as many of the standard historical sources as are necessary, and that are reasonably ascertainable and likely to be useful." (ASTM E 1527-97, Section 7.3.2 page 11.)

EDR's Historical Topographic Map Report includes a search of public and private color historical topographic map collections.

Topographic Maps

A topographic map (topo) is a color coded line-and-symbol representation of natural and selected artificial features plotted to a scale. Topos show the shape, elevation, and development of the terrain in precise detail by using contour lines and color coded symbols. Many features are shown by lines that may be straight, curved, solid, dashed, dotted, or in any combination. The colors of the lines usually indicate similar classes of information. For example, topographic contours (brown); lakes, streams, irrigation ditches, etc. (blue); land grids and important roads (red); secondary roads and trails, railroads, boundaries, etc. (black); and features that have been updated using aerial photography, but not field verified, such as disturbed land areas (e.g., gravel pits) and newly developed water bodies (purple).

For more than a century, the USGS has been creating and revising topographic maps for the entire country at a variety of scales. There are about 60,000 U.S. Geological Survey (USGS) produced topo maps covering the United States. Each map covers a specific quadrangle (quad) defined as a four-sided area bounded by latitude and longitude. Historical topographic maps are a valuable historical resource for documenting the prior use of a property and its surrounding area, and due to their frequent availability can be particularly helpful when other standard historical sources (such as city directories, fire insurance maps, or aerial photographs) are not reasonably ascertainable.

Aerial Photography Print Service

Environmental Data Resources, Inc.'s (EDR) Aerial Photography Print Service is a screening tool designed to assist professionals in evaluating potential liability on a target property resulting from past activities. ASTM E 11527-94, Section 7.3 on Historical Use Information, identifies the prior use requirements for a Phase I environmental site assessment. The ASTM standard requires a review of *reasonably ascertainable standard historical sources. Reasonably ascertainable means information that is publicly available, obtainable from a source with reasonable time and cost constraints, and practically reviewable.*

To meet the prior use requirements of ASTM E 1527-97, Section 7.3.2, the following *standard historical sources* may be used: aerial photographs, fire insurance maps, property tax files, land title records (although these cannot be the sole historical source consulted), topographic maps, city directories, building department records, or zoning/land use records. ASTM E 1527-94 requires *"All obvious uses of the property shall be identified from the present, back to the property's obvious first developed use, or back to 1940, whichever is earlier. This task requires reviewing only as many of the standard historical sources as are necessary, and that are reasonably ascertainable and likely to be useful."* (ASTM E 11527-94, Section 7.3.2, page 11).

Aerial Photographs

Aerial photographs are a valuable historical resource for documenting past land use and can be particularly helpful when other historical sources (such as city directories or fire insurance maps) are not reasonably ascertainable. The EDR Aerial Photograph Print Service includes a search of local aerial photograph collections flown by public and private agencies for the state of New Jersey. EDR Sanborn's professional field-based researchers provide digitally reproduced historical aerial photographs at ten year intervals.

APPENDIX D

AERIAL PHOTOGRAPHS AND REVIEW

PMK reviewed historical aerial photographs of the Site and surrounding areas for the years 1954, 1963, 1972, 1984 and 1995. The aerial photographs were provided by Environmental Data Resources, Inc. Observations made during our review are detailed below.

1954 Aerial Photograph – 1" = 750'

Our review of the 1954 aerial photograph indicates that the property is an open area occupied by a baseball diamond. There are wooded areas to the north, south and east of the property with a stream located to the north and south of the property. To the east of the property there are numerous small structures separated by secondary roads. On the other side of the stream to the south of the property is a railroad. To the northwest of the ball field is an open area with no vegetation with some small objects located on the north section of the property. This area appears to be a dump.

1963 Aerial Photograph – 1" = 750'

Our review of the 1963 aerial photograph indicates that the property remains undeveloped, however less trees are present in the north section of the property. The former open area in the northwest has vegetations present now, however another open area is present in the northeast corner of the property. There appears to be a dirt road going through the property from a road in the southeast corner of the property and ends in the former open area in the northwest. The small objects are no longer present in this open area.

1972 Aerial Photograph – 1" = 833'

Our review of the 1972 aerial photograph indicates the property remains relatively unchanged, however there is a square structure located in the northwest corner of the property, which has been identified as tennis courts by Borough officials.

1984 Aerial Photograph – 1" = 1000'

Our review of the 1984 aerial photograph indicates the property no longer has the square structure present in the northwest of the property. The property remains undeveloped with the baseball diamond less defined.

1995 Aerial Photograph – 1" = 833'

Our review of the 1995 aerial photograph indicates the property remains relatively unchanged since the 1984 aerial photograph.

Glossary of Terms

A.A.A.

Aerial photograph flyer: Agriculture Adjustment Administration (Federal).

A.S.C.S

Aerial photograph flyer: Agricultural Stabilization and Conservation Service (Federal)

Address Change

Indicates that a change of address has occurred; indicates new address. A change of address may occur when a city, street, or the address ranges of a street are restructured.

Address in Research Source

Indicates that a property is listed at a different address than the one provided by the user. Generally occurs when a property is located on a corner or, when the physical address of a property is different than its mailing address.

Address Not Listed in Research Source

Occurs when a specific site address is not listed in city directories and/or fire insurance maps.

Adjoining

Any property that is contiguous, or a property that would be contiguous if not for a public thoroughfare, to the target property. *To differentiate from each adjoining property, stand at the target property's "front door" facing the street.*

Adjoining Back

Property directly to the rear of the target property.

Adjoining Front

Property directly in front of the target property.

Adjoining Left

Property directly to the left of the target property.

Adjoining Right

Property directly to the right of the target property.

Adjoining Surrounding Area

Property that may adjoin the target property but due to lack of specific map information cannot be located precisely. This situation typically occurs when city directory information, but not fire insurance map information, is available.

C.A.S

Aerial photograph flyer: Chicago Aerial Survey (private).

C.S.S.

Aerial photograph flyer: Commodity Stabilization Service (Federal).

Cartwright

Aerial photograph flyer: Cartwright (private)

CD

City Directory

Commercial

Any property including, but not limited to, property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; property used for residential purposes that has more than four residential dwelling units.

Commercial or Industrial

Property that has either a commercial *or* an industrial use. Examples include retail stores, manufacturing facilities, factories, and apartment buildings.

D.N.R.

Aerial photograph flyer: Department of National Resources (state).

D.O.T.

Aerial photograph flyer: Department of Transportation (state).

Fairchild

Aerial photograph flyer: Fairchild (private).

FIM

Fire Insurance Map

Flood Insurance Rate Maps

Flood Insurance Rate Maps are produced by the Federal Emergency Management Agency (FEMA). These maps indicate special flood hazard areas, base flood elevations and flood insurance risk zones.

Flood Prone Area Maps

Flood Prone Area maps are produced by the United States Geological Survey (USGS). Areas identified as flood prone have been determined by available information gathered from past floods.

F.S.

Aerial photograph flyer: Forest Service (Federal).

Geonex

Aerial photograph flyer: Geonex (private).

M.C.

Aerial photograph flyer: Metropolitan Council of the Twin Cities Area (state).

Map Required Not Available in Local Collection

Property is located on a fire insurance map sheet not available in local and/or microfilm collection.

Mark Hurd

Aerial photograph flyer: Mark Hurd (private)

Multiple Locations

Indicates that there are two or more sites adjoining the target property's border.

N.A.P.P.

Aerial photograph flyer: National Aerial Photography Program (Federal).

National Wetland Inventory Maps

National Wetland Inventory Maps are produced by the U.S. Fish and Wildlife Service, a division of the U.S. Department of the Interior. Wetland and deepwater habitat information is identified on a 7.5 minute U.S.G.S. topographic map. The classification system used categorizes these habitats into five systems: marine, estuarine, riverine, lacustrine and palustrine.

No Return

Indicates that site owner was unavailable at time of surveyor's contact. *Applies only to city directories.*

No Structure Identified on Parcel

Used when site boundaries and/or site address is indicated on a fire insurance map; no structure details exist.

Other

Occurs when the site's classification is different than EDR's standard categories. Examples may include undeveloped land and buildings with no specified function.

P.M.A.

Aerial photograph flyer: Production and Marketing Administration (Federal).

Pacific Aerial

Aerial photograph flyer: Pacific Aerial (private)

Portion

Refers to the fire insurance map information identified on the four quadrants of a target or adjoining property. The portions are referred to as *Frontright*, *Frontleft*, *Backright*, and *Backleft* and are determined as if one were standing at the front door, facing the street.

Property Not Defined

Used when property is not clearly demarcated on a fire insurance map.

Residential

Any property having fewer than five dwelling units used exclusively for residential purposes.

Residential with Commercial Uses (a.k.a. Multiple Purpose Address)

A business (firm) and residence at the same address. Examples include a doctor, attorney, etc. working out of his/her home.

Sidwell

Aerial photograph flyer: Sidwell (private).

Site Not Mapped

Occurs when an adjoining property has not been mapped by fire insurance map surveyors.

Teledyne

Aerial photograph flyer: Teledyne (private)

Topographic Maps

Topographic maps are produced by the United States Geological Survey (USGS). These maps are color coded line and symbol representations of natural and selected artificial features plotted to scale.

Turnbow

Aerial photograph flyer: Michael Turnbow (private)

U.S.D.A.

Aerial photograph flyer: United States Department of Agriculture (Federal).

U.S.D.I.

Aerial photograph flyer: United States Department of the Interior (Federal).

U.S.G.S.

Aerial photograph flyer: United States Geological Survey (Federal).

Vacant

May refer to an unoccupied structure or land. *Used only when fire insurance map or city directory specifies 'vacant.'*

W.P.A.

Aerial photograph flyer: Works Progress Administration (Federal).

WALLACE

Aerial photograph flyer: Wallace (private).

APPENDIX E

LOCAL AGENCY FILE REVIEW

PMK Group reviewed files regarding the subject site, which are maintained by the Borough of South Plainfield and local County departments. Pertinent information discovered during the course of these reviews is summarized below.

Tax Assessor's Office

Records maintained by the City Tax Assessor's Office indicate that the Borough of South Plainfield own the property located near the intersection of Kaine Avenue and Church Street, known as the Veteran Memorial Park. The property is identified as Block 260, Lot 15.02 on the Borough Tax Maps. No other information on the property was available from the tax assessor's files.

Building Department

Files maintained by the Borough's Building Department revealed various building permits were issued for the property in the late 1980's and early 1990's for the construction of the three onsite structures: bathroom house, gazebo and electrical shed.

Fire Department

No information on the property was on file at the Fire Department Headquarters.

Health Department

No information on the property was on file at the Borough Health Department.

Environmental Commission

Files maintained by the South Plainfield Environmental Commission identified an old tennis court was located in the area of the black ooze. At present time no tennis courts exist on the property. The files also indicate the Environmental Protection Agency (EPA) has been sampling the Bound Brook as part of the Cornell Dubilier investigation which is identified on the CERCLIS, SHWS and NPL listing in the Site Report by EDR dated March 6, 2002.

Middlesex County Hazardous Materials Unit/ County Emergency Services Center

No information regarding the Site was on file at the Middlesex County Hazardous Material Unit/ County Emergency Services Center.

Middlesex County Health Department

No information regarding the Site was on file at the Middlesex County Health Department (MCHD) although Nate Byrd of the NJDEP informed PMK that all sampling information regarding the black "tar like" substance was forwarded to the MCHD. PMK spoke to Don Dingler, office manager of the Middlesex County Health Department, any files that were sent from the NJDEP were not received by them, however stated their office had changed addresses five times in the last several years. Don Dingler said he would forward any NJDEP information to our office if they receive it.

STATE & FEDERAL AGENCY FILES

A Site Report, dated March 6, 2002, was provided by Environmental Data Resources, Inc., of Southport, Connecticut. An analysis of the following databases was provided by EDR:

FEDERAL DATABASES

- National Priority List (NPL)
- Proposed NPL
- Delisted NPL
- NPL Liens
- Records of Decision (ROD)
- Biennial Reporting System
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)
- CERCLIS-No Further Remedial Action Planned (CERCLIS-NFRAP)
- CERCLA Consent Decrees (CONSENT)
- Resource Conservation and Recovery Information System (RCRIS)
 - Treatment, Storage, Disposal Facilities (TSD)
 - Corrective Action Sites (CORRACTS)
 - Small and Large Quantity Generators (SQG/LQG)
- RCRAS Administrative Action Tracking System (RAATS)
- Toxic Chemical Release Inventory System (TRIS)
- Toxic Substances Control Act (TSCA)
- Federal Insecticide, Fungicide & Rodenticide/TSCA Tracking System (FTTS)

STATE DATABASES

- Facility Index System (FINDS)
- Hazardous Materials Information Reporting System (HMIRS)
- Material Licensing Tracking System (MLTS)
- Mines Master Index File (MINES)
- PCB Activity Database System (PADS)
- Emergency Response Notification System (ERNS)
- State Hazardous Wastes Sites (SHWS)
- Solid Waste Facilities/Landfills (SWL)
- Registered Underground Storage Tanks (UST)
- Leaking Underground Storage Tanks (LUST)
- New Jersey Spills/Release
- New Jersey Brownfields
- New Jersey Major Facilities
- Publicly Funded Cleanups Site Status Report (PF)
- Chromate Chemical Production Waste Sites (CHROME)

EDR PROPRIETARY DATABASES

- Former Manufactured Gas Sites (COAL GAS)

SUMMARY:

A review of March 6, 2002, Site Report revealed that our site was listed on the New Jersey Release database. It should be noted the listing was for Veterans Field on Kean Avenue, South Plainfield, New Jersey, however it appears that this is the same site as Veterans Memorial Park at the intersection of Church Street and Kaine Avenue. The incident was listed as soil contamination and was described as "tar in the center field by track." The incident was issued a NJDEP case number, 01-08-07-1845-23 and was issued NJDEP facility number 82845.

A copy of the March 6, 2002, Site Report is presented as part of this Appendix. In addition the United States Environmental Protection Agency (USEPA) and New Jersey Department of Environmental Protection (NJDEP) were contacted for information pertaining to the property. At this time the NJDEP information pertaining to the NJDEP sampling of the black, tar like, substance was requested, however, Nate Byrd of the NJDEP Site Remediation office stated all information pertaining to this event was forwarded to the Middlesex County Health Department. PMK has received a correspondence from the USEPA confirming our request for information. Our letters of request to the NJDEP and USEPA and their correspondence are included in this Appendix. Any other pertinent NJDEP or USEPA information will be forwarded to the client under separate cover, pending receipt by PMK.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the target property includes a tolerance of +/- 10 feet. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL ASTM STANDARD

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/29/2002 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
CORNELL DUBILIER ELECTRONICS I	333 HAMILTON BLVD	1/4 - 1/2 SSE	G20	31

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 11/21/2001 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
CORNELL DUBILIER ELECTRONICS I	333 HAMILTON BLVD	1/4 - 1/2 SSE	G20	31

CERCLIS-NFRAP: As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund Action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

A review of the CERCLIS-NFRAP list, as provided by EDR, and dated 11/21/2001 has revealed that there is 1 CERCLIS-NFRAP site within approximately 0.25 miles of the target property.

STATE ASTM STANDARD

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection & Energy's Site Status Report.

A review of the SHWS list, as provided by EDR, has revealed that there are 23 SHWS sites within approximately 1 mile of the target property.

CERCLIS-NFRAP Classification Data:

Site Incident Category:	Not reported	Federal Facility:	Not a Federal Facility
Non NPL Code:	Removal Only Site (No Site Assessment Work Needed)		
Ownership Status:	Not reported	NPL Status:	Not on the NPL
Site Description:	Currently, the facility is a solvents repackaging business where waste dry cleaning solvents are recovered from area dry cleaners. Formerly, the facility was used for reclaiming metals from electronic components. Approximately 30 - 40 drums discovered containing chemicals including chromic acid, muriatic acid, and alkali, possibly sodium hydroxide. An assessment indicates the site to be eligible for a removal action. Request for archiving made by the Removal Program 8/31/2001 - Decision not to pursue Cost Recovery (J. Witkowski/L. Peterson)

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING-

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List

Source: EPA

Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/29/02

Date Made Active at EDR: 02/25/02

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 02/04/02

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/21/01

Date Made Active at EDR: 02/04/02

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/26/01

Elapsed ASTM days: 40

Date of Last EDR Contact: 12/26/01

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING-

STATE OF NEW JERSEY ASTM STANDARD RECORDS

SHWS: Known Contaminated Sites in New Jersey Except Those Associated with Bureau of Underground Storage Sites (BUST)

Source: New Jersey Department of Environmental Protection

Telephone: 609-292-8761

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 1999 from the U.S. Fish and Wildlife Service.

New Jersey State Wetlands

Source: New Jersey Department of Environmental Protection

This data was obtained by EDR in 1998 from the New Jersey Department of Environmental Protection.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

VETERANS MEMORIAL PARK
CHURCH STREET/KANE AVENUE
SOUTH PLAINFIELD, NJ 07080

TARGET PROPERTY COORDINATES

Latitude (North):	40.580601 - 40° 34' 50.2"
Longitude (West):	74.416000 - 74° 24' 57.6"
Universal Transverse Mercator:	Zone 18
UTM X (Meters):	549426.8
UTM Y (Meters):	4492154.0
State Plane X (Feet):	2069629.2
State Plane Y (Feet):	636544.4

EDR's GeoCheck Physical Setting Source Addendum has been developed to assist the environmental professional with the collection of physical setting source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 requires that a current USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Model) be reviewed. It also requires that one or more additional physical setting sources be sought when (1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to or from the property, and (2) more information than is provided in the current USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good commercial or customary practice, to assess the impact of migration of recognized environmental conditions in connection with the property. Such additional physical setting sources generally include information about the topographic, hydrologic, hydrogeologic, and geologic characteristics of a site, and wells in the area.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata. EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

USGS TOPOGRAPHIC MAP ASSOCIATED WITH THIS SITE

Target Property: 2440074-E4 PLAINFIELD, NJ
Source: USGS 7.5 min quad index

GENERAL TOPOGRAPHIC GRADIENT AT TARGET PROPERTY

Target Property: General SW

Source: General Topographic Gradient has been determined from the USGS 1 Degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> MIDDLESEX, NJ	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	3402790001B / CBPP
Additional Panels in search area:	3402790003B / CBPP

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> PLAINFIELD	NWI Electronic <u>Data Coverage</u> Not Available
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Site-Specific Hydrogeological Data*:

Search Radius: 2.0 miles
Location Relative to TP: 1/4 - 1/2 Mile SE
Site Name: Cornell Dubilier Electronics I
Site EPA ID Number: NJD981557879
Groundwater Flow Direction: N AND GENERALLY FOLLOWS SURFACE TOPOGRAPHY.
Inferred Depth to Water: less than 60 feet.
Hydraulic Connection: The surficial stratified drift and underlying Brunswick Formation are hydraulically connected.
Sole Source Aquifer: No information about a sole source aquifer is available
Data Quality: Not reported

AQUIFLOW®

Search Radius: 2.000 Miles.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Mesozoic
System: Triassic
Series: Triassic
Code: Tr (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

* 1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were compiled under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	8 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
gravelly - sandy loam
sandy loam
shaly - loam

Surficial Soil Types: silt loam
gravelly - sandy loam
sandy loam
shaly - loam

Shallow Soil Types: fine sandy loam

Deeper Soil Types: loam
unweathered bedrock
weathered bedrock
very gravelly - sand

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

According to ASTM E 1527-00, Section 7.2.2, "one or more additional state or local sources of environmental records may be checked, in the discretion of the environmental professional, to enhance and supplement federal and state sources... Factors to consider in determining which local or additional state records, if any, should be checked include (1) whether they are reasonably ascertainable, (2) whether they are sufficiently useful, accurate, and complete in light of the objective of the records review (see 7.1.1), and (3) whether they are obtained, pursuant to local, good commercial or customary practice." One of the record sources listed in Section 7.2.2 is water well information. Water well information can be used to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 1999 from the U.S. Fish and Wildlife Service.

New Jersey State Wetlands

Source: New Jersey Department of Environmental Protection

This data was obtained by EDR in 1998 from the New Jersey Department of Environmental Protection.

HYDROGEOLOGIC INFORMATION

AQUIFLOW[®] Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec. Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the national Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-260-2805

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-260-2805

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.

Ambient Groundwater Quality of the New Jersey Part of the Newark Basin. Natural groundwater quality in the Newark Basin summarize natural groundwater quality in sedimentary bedrock formations of the Newark basin part of the Piedmont physiographic province of New Jersey.

New Jersey Radon Tier Assignment Report

Source: Department of Environmental Protection

The DEP's tier system classifies municipalities as having high, moderate or low potential for indoor radon problems based on the percentage of homes with radon concentrations greater than or equal to 4 picocuries/liter (pCi/l).

RADON

Area Radon Information: The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones: Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

RE: REQUEST FOR INFORMATION/FREEDOM OF INFORMATION ACT
VETERANS MEMORIAL PARK
BLOCK 260 LOT 15.02
SOUTH PLAINFIELD, MIDDLESEX COUNTY, NEW JERSEY
PMK GROUP #0502014

Dear Ms. Englehardt:

Pursuant to the Freedom of Information Act (FOI), **PMK Group (PMK)** is requesting information from the New Jersey Department of Environmental Protection (NJDEP) for the above-referenced site in the Borough of South Plainfield, Middlesex County, New Jersey.

PMK has been retained by the Borough of South Plainfield to conduct a Preliminary Site Assessment Report (PA) for the above referenced site; as such we are required to review files maintained by NJDEP. **PMK** is requesting permission to review all pertinent files regarding the above referenced sites.

If there are any questions regarding this request, please contact our office at (908) 497 - 8900. Thank you in advance for your anticipated time and cooperation.

Respectfully submitted,

PMK GROUP

RE: Freedom of Information Act (FOIA), 5 U.S.C. 552
Request No. **02-RIN-00991-02**

Dear Mr. JEFFERY VILLANOVA,

Thank you for your FOIA request, dated March 4, 2002, and received in this office on March 6, 2002, for records related to VETERANS MEMORIAL PARK IN SOUTH PLAINFIELD, NJ. The Agency has twenty (20) working days to respond to your request, except when unusual circumstances exist that would require an extension of time under 5 U.S.C. 552(a)(6)(B). We hope to respond to you soon. In the interim, please contact us if you have any questions about your request. Please cite your FOIA request number in all communications.

Sincerely,

Freedom of Information Officer 2CD
Office: (212)637-3668
Fax: (212)637-5046

APPENDIX G

PHOTOGRAPHS

APPENDIX H

AREAS OF CONCERN

AOC #1 – Historic Fill or any Other Fill Material – Based on a review of the available Historical Topographical Maps and municipal personnel interviews, the property and adjacent properties were reportedly filled in to allow for municipal use as the majority of the Site consisted of low-lying, swampy areas. PMK sampled in an attempt to verify the presence and contents of the fill material and to identify potential contaminants, which may be present in said materials. The results of the sampling are included as Appendix I.

AOC #2 – Electrical Transformers – Our site reconnaissance identified one transformer mounted on a utility pole on the property. As no leaking or staining was noted on the transformer, PMK recommends no further investigation of this AOC.

AOC #3 Areas of Stressed Vegetation – Several area of stressed vegetation were noted throughout the northern and central portions of the property. PMK recommends collecting soil samples within the limits of the stressed areas in an attempt to identify potential impacts in the underlying soils.

AOC #4 Areas which receive flood or storm water from potentially contaminated areas – Based upon field observations and review of the Site Report by Environmental Data Resources, Inc, the Site is depicted as being within the 100 year flood zone. It should also be noted that three contaminated sites have been reported up gradient of the Site. PMK recommends further investigation of this AOC in an attempt to identify potential environmental impacts to the Site from offsite sources.

AOC #5 Black Ooze emanating from the Ground – During our site reconnaissance, sections of the grass field had areas where a black substance had emanated from the ground. PMK recommends further investigation of this AOC to attempt to identify the noted substance and to evaluate the potential for the substance to impact the Site.

AOC #6 Sink Holes – During our site reconnaissance several sinkholes were noted on the property. PMK recommends performing a geophysical survey of the area to identify any subsurface metallic anomalies, including, but not limited to, buried drums. The need for further soil investigations will be determined based on the results of the geophysical survey.

AOC #7 Discolored or Spill Areas -There are two areas in close proximity of each where a blue staining and a black powder like substance were observed on the ground. During a second visit the blue substance was identified as the remains of a melted plastic drum, used throughout the Site as garbage cans and the black powder is the ash from a charcoal barbecue grill from the picnic area. PMK recommends these areas be cleaned and disposed of properly and recommends no further investigation.
